## PREFACE

The first cumulative index to the Proceedings of the Cambridge Philosophical Society was published in 1961 and entitled *Author Index to Proceedings of the Cambridge Philosophical Society Volumes 1 to 50 (1843–1954), and Transactions of the Cambridge Philosophical Society Volumes 1 to 23 (1822–1928)*. An Index covering the Proceedings Volumes 51 to 60 (1955–1964) was published in 1967.

The Index now published covers the Proceedings Volumes 61 to 70 (1965–1971). Volumes 61 to 64 were published annually, each volume containing four parts. From 1969 (Volume 65) two volumes, each containing three parts, have been published each year.

## INDEX OF AUTHORS

- ABDELKADER, M. A. Infinite sets of identities for classical polynomials and Bessel functions. **64** (1968) 105–112
- ACKROYD, J. A. D. On the laminar compressible boundary layer with stationary origin on a moving flat wall. **63** (1967) 871–888  
On the laminar compressible boundary layer induced by the passage of a plane shock wave over a flat wall. **63** (1967) 889–907
- ADAMS, J. F. & WALKER, G. On complex Stiefel manifolds. **61** (1965) 81–103
- ADAMS, J. F. A periodicity theorem in homological algebra. **62** (1966) 365–377
- AGARWAL, R. P. & VERMA, A. Generalized basic hypergeometric series with unconnected bases. **63** (1967) 727–734
- AGARWAL, R. P. Certain fractional  $q$ -integrals and  $q$ -derivatives. **66** (1969) 365–370
- AGRAWAL, B. M. Application of  $\Delta$  and  $E$  operators to evaluate certain integrals. **64** (1968) 99–144
- ALBERT, R. H. Still another way to calculate representations of the three-dimensional pure rotation group. **63** (1967) 273–275  
Computer-calculated explicit forms for representations of the three-dimensional pure rotation group. **65** (1969) 107–110
- ALLAN, G. R. A note on  $B^*$ -algebras. **61** (1965) 29–32
- ALLEN, D. W. & BULLARD, E. C. The secular variation of the earth's magnetic field. **62** (1966) 783–809
- ALLISON, D. On obtaining zero-free regions for the zeta-function from estimates of  $M(x)$ . **67** (1970) 333–337
- ALLSBROOK, JANET & BAGLEY, R. W. Equicontinuity and  $\mathcal{A}$ -recursive transformation groups. **61** (1965) 333–336
- ANDERSON, N. & ARTHURS, A. M. Complementary variational principles for  $\phi^{iv} = f(\phi)$ . **68** (1970) 173–177
- ANDERSON, W. M. Diffraction of an incomplete expansion wave by a corner. **63** (1967) 909–921
- ANG, D. D., KNOPOFF, L. & MAL, A. K. Diffraction of elastic waves by a rigid circular disc. **64** (1968) 237–247
- ARMSTRONG, M. A. On the fundamental group of an orbit space. **61** (1965) 639–646  
The fundamental group of the orbit space of a discontinuous group. **64** (1968) 299–301
- ARTHURS, A. M. On the Feynman integral for classical waves. **62** (1966) 463–465
- ARTHURS, A. M. & ROBINSON, P. D. Complementary variational principles for  $\nabla^2\phi = f(\phi)$  with applications to the Thomas–Fermi and Liouville equations. **65** (1969) 535–541
- ARTHURS, A. M. Extremum principles for a class of boundary value problems. **65** (1969) 803–806  
A generalized Euler–Lagrange equation. **66** (1969) 399–401
- ARTHURS, A. M. & ROBINSON, P. D. Extremum principles for electrostatic and magnetostatic problems. **66** (1969) 433–436
- ARTHURS, A. M. & ANDERSON, N. Complementary variational principles for  $\phi^{iv} = f(\phi)$ . **68** (1970) 173–177
- ASHOUR, A. A. Note on the relations between series equations and integral equations. **61** (1965) 695–696
- ASKEY, R. & GASPER, G. Jacobi polynomial expansions of Jacobi polynomials with non-negative coefficients. **70** (1971) 243–255
- ATKIN, A. O. L., BRATLEY, P., MACDONALD, I. G. & MCKAY, J. K. S. Some computations for  $m$ -dimensional partitions. **63** (1967) 1097–1100
- ATKINSON, C. P., DHOOPAR, B. L. & SWANN, H. The generalization of modal subspaces in the complex domain. **65** (1969) 731–740

- AU-YEUNG, Y. H. A note on some theorems on simultaneous diagonalization of two Hermitian matrices. **70** (1971) 383–386
- BAGLEY, R. W. & ALLSBROOK, JANET. Equicontinuity and  $\mathcal{A}$ -recursive transformation groups. **61** (1965) 333–336
- BAJPAI, S. D. Some integrals involving Gauss's hypergeometric function and Meijer's  $G$ -function. **63** (1967) 1049–1053  
 Use of Gauss's hypergeometric function and Meijer's  $G$ -function in the production of heat in a cylinder. **64** (1968) 1049–1054  
 Transformation of an infinite series of  $G$ -function. **65** (1969) 467–469  
 An expansion formula for Fox's  $H$ -function. **65** (1969) 683–685  
 On some results involving Fox's  $H$ -function and Jacobi polynomials. **65** (1969) 697–701  
 Fourier series of generalized hypergeometric functions. **65** (1969) 703–707  
 An integral involving Fox's  $H$ -function and Whittaker functions. **65** (1969) 709–712  
 Special functions and forced symmetrical vibrations of a circular elastic plate. **66** (1969) 349–353  
 Some expansion formulae for Fox's  $H$ -function involving exponential functions. **67** (1970) 87–92
- BAKER, A. Simultaneous rational approximations to certain algebraic numbers. **63** (1967) 693–702  
 A note on an integral integer-valued function of several variables. **63** (1967) 715–720  
 Bounds for the solutions of the hyper-elliptic equation. **65** (1969) 439–444
- BAKER, A. & COATES, J. Integer points on curves of genus 1. **67** (1970) 595–602
- BAKER, J. W. & PETERSEN, G. M. Inclusion of sets of regular summability matrices. II. **61** (1965) 381–394. III. **62** (1966) 389–394  
 Summability fields which span the bounded sequences. **63** (1967) 99–106
- BAKER, R. C. A diophantine problem on groups. III. **70** (1971) 31–47
- BAKSHI, S. K. On the effect of magneto-thermo-elastic interactions on the cooling process of an infinite circular cylinder. **67** (1970) 173–180
- BALAZS, N. L. On the Feynman path-integral in  $q, \dot{q}, p$  space. **66** (1969) 403–405
- BALDWIN, P. Finite amplitude convection in a self-gravitating fluid sphere containing heat sources. **63** (1967) 855–870
- BANERJEE, S. Simultaneous confidence intervals for two linear functions of population means when population variances are not equal. **67** (1970) 365–370
- BARCUS, W. D. On the complexes of Hirsch and Eilenberg–Moore. **64** (1968) 953–960  
 The principal bundle action in the Eilenberg–Moore spectral sequence. **68** (1970) 87–93
- BARNES, B. A. Subalgebras of modular annihilator algebras. **66** (1969) 5–12
- BARNETT, S. Regular polynomial matrices having relatively prime determinants. **65** (1969) 585–595  
 Degrees of greatest common divisors of invariant factors of two regular polynomial matrices. **66** (1969) 241–245  
 Greatest common divisor of several polynomials. **70** (1971) 263–268  
 A new formulation of the Liénard–Chipart stability criterion. **70** (1971) 269–274
- BARNETT, V. D. Wald's identity and adsorption probabilities for two-dimensional random walks. **61** (1965) 747–762
- BARR, G. E. The integration of generalized hypergeometric functions. **65** (1969) 591–595
- BARRATT, P. J. & COLLINS, W. D. The scattering cross-section of an obstacle in an elastic solid for plane harmonic waves. **61** (1965) 969–981.
- BARRATT, P. J. Multiple scattering of plane harmonic elastic waves in an infinite solid by an arbitrary configuration of obstacles. **66** (1969) 469–480
- BARSOUM, F. R. & BASSALI, W. A. Bending of an eccentrically loaded and concentrically supported thin circular plate. I. **62** (1966) 99–111  
 The transverse flexure of uniformly loaded curvilinear and rectilinear polygonal plates. **62** (1966) 523–540
- BASSALI, W. A. & BARSOUM, F. R. Bending of an eccentrically loaded and concentrically supported thin circular plate. I. **62** (1966) 99–111  
 The transverse flexure of uniformly loaded curvilinear and rectilinear polygonal plates. **62** (1966) 523–540

- BASTERFIELD, J. G. & KELLY, L. M. A characterization of sets of  $n$  points which determine  $n$  hyperplanes. **64** (1968) 585–588
- BEARDON, A. F. On the Hausdorff dimension of general Cantor sets. **61** (1965) 679–694  
 Montel's theorem for subharmonic functions and solutions of partial differential equations. **69** (1971) 123–150  
 Integral means of subharmonic functions. **69** (1971) 151–152
- BEHZAD, M. A criterion for the planarity of the total graph of a graph. **63** (1967) 679–681
- BELL, R. J. & DEAN, P. On the shifted eigenvalue problem. **67** (1970) 97–99
- BENNETT, G. & COOPER, J. B.  $(LF)$ -spaces with absolute bases. **67** (1970) 283–286
- BERNAU, S. J. On semi-normal lattice rings. **61** (1965) 613–616
- BEZÁK, V. Path representations of the quantum-mechanical energy-level density. **64** (1968) 787–793
- BHARGAVA, R. D. & KAPOOR, O. P. Circular inclusion in an infinite elastic medium with a circular inhomogeneity. **62** (1966) 113–127
